

1. What has the instructor done especially well in the teaching of the course?

Super accessible — created a helpful environment for communal problem-solving

Jobs were good — tasks were clear and it was a helpful process

2. Suggestions for improving the course?

Deadlines! More small projects ~~were~~ would be helpful, to test out the skills incrementally. Also, I hate group work, but I think in this class it could be very constructive to have a built-in experience helping each other out.

In-class explanations ^{about the theory behind the work} were sometimes less helpful than if we had been able to get our hands on the programs and fiddle around to start with.

Thanks for the one marketable skill to be gained at college!
I'd love to know more about where our new GIS skills fit in the spectrum of entry-level marketability

MSO!

1. What has the instructor done especially well in the teaching of the course?

2. Suggestions for improving the course?

I think the class should be taught in a computer lab the entire time.

1. What has the instructor done especially well in the teaching of the course?

He has done an excellent job at explaining things. He was extremely helpful during his office hours, too. Very approachable. He's also highly entertaining.

2. Suggestions for improving the course?

I think the exercises should have been assigned w/ a due date. I definitely didn't even get through half of the exercises. ~~because~~ Having due dates would have really forced me to do the work.

1. What has the instructor done especially well in the teaching of the course?

Has been very encouraging, available, helpful, and funny.

I wish I had taken more courses with him. I have learned a lot about geography that I

2. Suggestions for improving the course?

Sometimes the language of explanations has been confusing; as well-intentioned as the prof. is, I think he should have a TA to help him clarify the instructions on labs. The class should be held in a computer lab. The prof. should update us more often of our grades.

1. What has the instructor done especially well in the teaching of the course?

I found the office hours the most helpful time in the class. One on one instruction is essential.

2. Suggestions for improving the course?

more time in front of a computer would be helpful. I would prefer a more structured class simply because it was really easy to fall behind and still slide by.

1. What has the instructor done especially well in the teaching of the course?

I really enjoy the instructor's approach to learning. You are inspiring, encouraging, & funny. I like all the ideas that we are exposed to & ways to look at things differently. This class time is truly invaluable to me — both for learning the subject matter & learning how to approach life.

2. Suggestions for improving the course?

In theory, I really like the fact that learning is up to the student in terms of assignments. Unfortunately, my other classes require so much work & I find it so stressful that I let this one slide. Its too bad because its what I am most interested in, but it just kept getting pushed to the side. I think due dates (not a ton, but a few) →

1. What has the instructor done especially well in the teaching of the course?

Thank you for taking the time to help me out, outside of the classroom. The one-on-one was really helpful!

2. Suggestions for improving the course?

I think this class should be taught in a computer lab! It would have helped tremendously to be able to navigate GIS while you taught it. ▽

1. What has the instructor done especially well in the teaching of the course?

Super enthusiastic

2. Suggestions for improving the course?

Have it in computer lab

1. What has the instructor done especially well in the teaching of the course?

Really appreciate time spent during office hours working on project.

2. Suggestions for improving the course?

please provide specific feedback on presentation (ppt)
